

Creating your own graphical body wrap for EZ-Cart

The following guide will show you how to create your graphical body wrap for your EZ-Cart. You will need to be comfortable using a graphic design program, such as Corel Draw, Adobe Illustrator or Adobe Photoshop. You will use the template on the second page of this guide to map your artwork to the appropriate panels. The template contains the left, right and front panels as a well as the mirrored canopy panels.

STEP 1

Open the template file in your graphic program of choice. If possible, place and lock the template on a separate layer.

STEP 2

Create and map your artwork for the front panel.
Note: any artwork falling outside of the outline will be cut off.

STEP 3

Create and map your artwork for the side panels.
Note: The placement of the wheel is for reference only. Be aware that anything you place in this area may be somewhat obstructed by the wheel.

STEP 4

The middle line indicates the peak of the awning.

Create and map your artwork for the canopy.
Ensure you rotate your artwork so it reads properly when viewed from either side of the cart.

STEP 5

Save your file as a high-resolution PDF. All bitmap images should be **400 DPI**.
Send the file to: info@cart-king.com

FINISHED

Cart-King will create a mock-up from the artwork supplied on the PDF. Your cart will look something like this.

Tips to remember:

Send the file to:

info@cart-king.com

- Copy or place template on separate layer.
- Use vector or line-art for best results.
- If using bitmap or photographic images, keep at 400 dpi.
- Save your artwork as PDF then email to: info@cart-king.com Cart King will print your graphics and FedEx to you asap.
